

# Control workloads and data on any infrastructure

Red Hat Software Partner

*“Containers and OpenShift are driving the new wave of IT. The most innovative organizations are leading this charge. Our partnership with RedHat brings our joint customers the ability to modernize applications across technology stacks and ecosystems by bridging the gap between a plan-driven automation approach and an event-driven, agile methodology.”*

Leon Stamm,  
Director Marketing, Stonebranch

## One platform to control any enterprise workloads and data on any infrastructure.

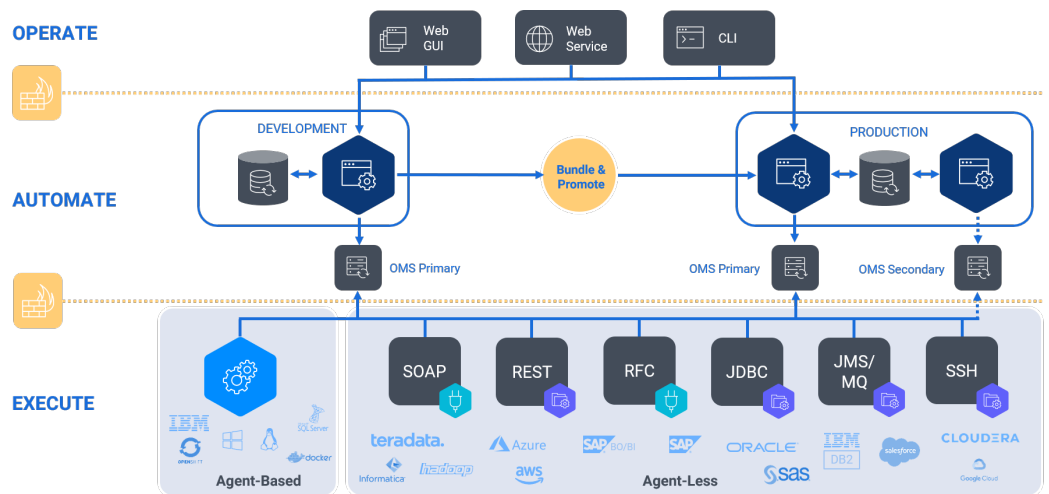

The Universal Automation Center (UAC) is a powerful IT automation platform that makes it possible for customers to seamlessly orchestrate workloads and data across any technology stack.

### Executive Summary

UAC’s Universal OpenShift Agent enables dynamic scheduling on OpenShift and manages a secure and reliable transfer of business data located on the mainframe, cloud storage platforms or any server to an application running on OpenShift and vice versa.

### Product Profile

The workflows of Universal Automation Center can gather data from different sources, deploy a container with a set of microservices, execute the microservices, safely store the results, and dynamically stop and remove the container.

### Product Benefits

Stonebranch delivers an entirely web-based application for managing and monitoring workloads and processes in real-time based on events within the modern enterprise.

- **Web-Based Application.** Universal Controller (UC), the central workload automation engine, is a purely web-based application
- **Vendor-Agnostic Agent Technology.** Universal Agents (UA) will integrate with any vendor’s workload automation engine.

*“Developers and architects looking to build new applications in, and for the cloud, or migrate existing applications to a cloud-based infrastructure, partner with Red Hat to develop and deliver more supportable solutions sooner. Red Hat certification assures a supportable platform for all types of customer deployment models.”*

Mike Werner,  
Senior director,  
Global Technology Partners, Red Hat

- **Integration Architecture.** Stonebranch has taken an open source-based approach for providing both upstream and downstream integrations to any business application.
- **Horizontal Scalability.** Through its internal architecture, Universal Automation Center provides nearly unlimited horizontal scalability.
- **Security & Compliance.** Universal Automation Center ensures compliance with a centralized audit trail of company processes, errors and remediation by utilizing the latest security and auditing standards
- **Integrated Data Supply Chain.** The integrated Universal Data Mover (UDM), a sub-component of Universal Agent, allows clients to fully integrate their enterprise-wide data supply chain into this layer of process orchestration.

## Use cases

Stonebranch helps simplify and build your IT automation roadmap:

- **Dynamic Workload Automation / Enterprise Job Scheduling.** Event-driven IT task automation that supports digital business by providing dynamic automation capabilities for task on any platform or application.
- **Data Supply Chain.** Transfer sensitive data between any platform (e.g. Mainframe, Linux®, Windows, or cloud storage platform) to an Application on OpenShift (and vice versa).
- **SAP Job Scheduling.** Orchestrate the entire SAP process consisting of SAP (ABAP) and non-SAP tasks, and eliminate drawbacks of the native SAP SM37 based scheduler.

## About Stonebranch

Stonebranch builds dynamic IT automation solutions that transform business IT environments from simple IT task automation into sophisticated, real-time business service automation, helping organizations achieve the highest possible Return on Automation. Headquartered in Atlanta, Georgia with points of contact and support throughout the Americas, Europe, and Asia, Stonebranch serves some of the world's largest financial, manufacturing, healthcare, travel, transportation, energy, and technology institutions.

## About Red Hat

Red Hat is the world's leading provider of enterprise open source software solutions, using a community-powered approach to deliver reliable and high-performing Linux, hybrid cloud, container, and Kubernetes technologies. Red Hat helps customers integrate new and existing IT applications, develop cloud-native applications, standardize on our industry-leading operating system, and automate, secure, and manage complex environments. Award-winning support, training, and consulting services make Red Hat a trusted adviser to the Fortune 500. As a strategic partner to cloud providers, system integrators, application vendors, customers, and open source communities, Red Hat can help organizations prepare for the digital future.
