## Company Description

HAProxy Technologies is a provider of software load balancers and application delivery controllers (ADCs) for cloud and enterprise applications. Companies like Booking.com, GitHub, Reddit, StackOverflow, Tumblr, Vimeo, Twilio and Yelp trust HAProxy for its reliable performance, extensible features, advanced security and vibrant community. Since 2000, HAProxy's range of solutions has empowered thousands of enterprises with the flexibility and confidence to securely deliver high-performance, high-availability websites and mobile applications at any scale and in any environment. Backed by a dedicated team of services and support professionals, HAProxy has become the industry benchmark for superior application delivery.

## Product Profile

HAProxy Enterprise Edition allows customers to take full advantage of HAProxy, a world renowned load balancer, and software application delivery controller, combined with enterprise-class features, services, and premium support. HAProxy Enterprise Edition is a powerful product tailored to your enterprise goals, requirements, and infrastructure.

## Overview

Empowering users to deliver applications with high availability, performance and security at any scale.

## Executive Summary

To meet the demands of today's applications, you need to ensure your application delivery controller has the flexibility, performance, security and scalability to deliver high availability in any environment. HAProxy Technologies has partnered with Red Hat® to deliver open source load balancing solutions that maximize the uptime, performance and security of their customers' applications. The solution leverages Red Hat® OpenShift, a secure, enterprise-grade container platform.

## Statement from Partner

*"Working closely with Red Hat has enabled HAProxy Technologies to provide greater flexibility and support to OpenShift customers. By actively engaging with OpenShift customers, we have been able to offer greater functionality, support and services to tailor our solution to specific company needs."*  
-Jonathan Bracken, VP of Marketing

## Statement from Red Hat Connect

*"Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model," said Mike Werner, senior director, Global Technology Partners, Red Hat. "Red Hat container certification assures a supportable and performant platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like HAProxy, resulting in the world's largest commercial ecosystem for containers."*

## Product Benefits

Increase performance, security and flexibility with HAProxy Technologies and Red Hat OpenShift through:

- Services and support from the authoritative experts on HAProxy
- Enterprise features to extend capabilities in security, performance and administration
- Access to the most stable, cutting-edge software load balancing software

## Use Cases

Discover proven use cases and business drivers the HAProxy solution for enterprises. The Enterprise Edition allows customers to maximize your application delivery controller capabilities.

- High Availability
- Application Acceleration
- Security
- Microservices
