Company Description

Joget Inc, incorporated in 2014 in the USA, is the developer of the Joget platform. Joget is an open source no-code/low-code application platform for faster, simpler digital transformation. Joget empowers business users, non-coders or coders to create enterprise applications for customer management, operational excellence, business process management and administration. Every organization demands easy to build and adaptable applications, and Joget enables those application delivery goals with a low total cost of ownership.

With almost 200,000 open source downloads and more than 10,000 community members since inception, the latest major release Joget Workflow v6 was introduced in 2018 with focus on modern User Experience (UX), and App Maintainability and Performance. The upcoming Joget DX platform is the next generation successor to Joget Workflow. From Workflow to Digital Transformation (DX), the product name change reflects the complete digital transformation capabilities offered by the platform.

Product Profile

Joget is an open source no-code/low-code application platform for faster, simpler digital transformation. Joget combines the best of business process automation, workflow management and rapid application development in a simple, flexible and open platform. Visual and web-based, it empowers non-coders to instantly build and maintain apps anytime, anywhere.

TECHNOLOGY PARTNER

CERTIFIED TECHNOLOGY

Overview

Accelerating and automating your application development along with infrastructure is key for achieving "Speed to Market". Joget and OpenShift together provides this capability.

Executive Summary

Containers are quickly becoming an integral part of enterprise infrastructure. Along with infrastructure automation, it is also critical to accelerate business application development since large parts of creating a business solution are the creation of business applications and the automation of business processes. Joget and Red Hat OpenShift together fulfil this gap by accelerating business application development and delivery using a web-based visual approach.

Statement from Partner

"As the Red Hat OpenShift platform is being widely adopted by enterprises, the overall commitment to accelerating the development of business solutions becomes critical. We at Joget are committed to provide a platform that helps accelerate application development and delivery" said Julian Khoo, VP Product Development at Joget, Inc. *"Our goal will be to continuously innovate to keep the platform simple, flexible and open for our customers."*

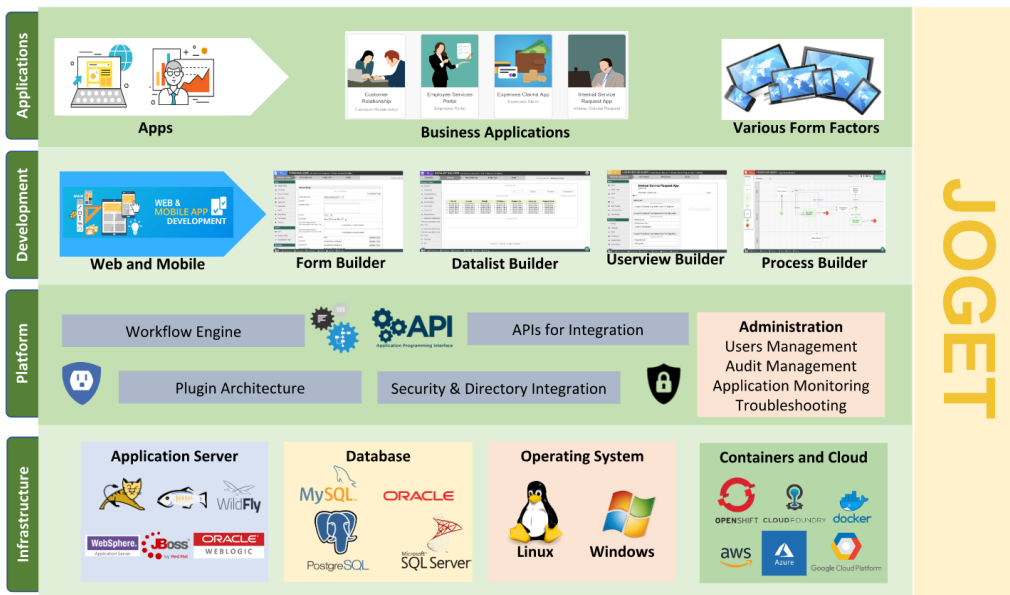

Statement from Red Hat Connect

"Developers and architects looking to build new applications in, and for the cloud, or migrate existing applications to a cloud-based infrastructure, partner with Red Hat to develop and deliver more supportable solutions sooner." said Mike Werner, Sr. Director, Global Technology Partners, Red Hat. *"Red Hat certification assures a supportable platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Joget, Inc. resulting in the world's largest open, and commercially supportable application ecosystem."*

Product Benefits

- Web-based visual approach empowers non-coders to instantly build and maintain apps anytime, anywhere.
- Unique App Generator feature quickly generates apps in minutes. Apps are automatically mobile optimized and cloud ready, reducing time to market from months to weeks or days.
- Comprehensive features, from beautiful Material Design inspired UX to integrated app monitoring. Modular plugin architecture, APIs for integration, and seamless app installs from the Joget Marketplace offer extensibility to meet any need.
- Flexibility and ease of use provide capability to easily change and release applications.
- Integration capabilities makes it seamless to integrate with APIs and other data sources across the enterprise.

SIMPLE

Visual, drag and drop.
Just a web browser needed,
anytime, anywhere.

FLEXIBLE

Build complete enterprise apps for
web and mobile.
Process apps, database apps,
integration, etc.

OPEN

On-premise, containers, private,
public or hybrid cloud.
OS, DB, app server independent.

Use Cases

- **Create Business Applications:** Create new business applications and processes for enterprise solutions in no time. Organizations do not even need developers to get started now.
- **Cloud Migration:** Thinking of moving applications to the cloud? Rebuild applications in weeks and days. Leverage the Joget platform to future proof applications and make them cloud and mobile ready.
- **Legacy Modernization:** Want to move away from old and rigid applications that you always wanted to modernize? Easily modernize applications using Joget. Sunset your legacy applications and create new ones in no time.

Joget container is Red Hat Certified Container and is available for customers to download from Red Hat certified container registry.
