Company Description

Balabit is a leading provider of Privileged Access Management and Log Management solutions that help organizations prevent, detect, and respond to cyberattacks involving privileged accounts, including insider threats and privileged identity theft.

Balabit's integrated PAM solution protects organizations in real-time from threats posed by the misuse of high risk and privileged accounts. Solutions include Privileged Session Management and Privileged Account Analytics, which together help organizations prevent, detect, and respond to cyber attacks involving privileged accounts, including both insider threats and external attacks using hi-jacked credentials.

Founded in 2000, Balabit has a proven track record, with 25 Fortune 100 customers.

Product Profile:

syslog-ng delivers log data critical to understanding what is happening in your IT environment. Whether it's user activity, performance metrics, network traffic, or any other log data, syslog-ng can collect and centralize it. You can remove data silos and gain full-stack visibility of your IT environment.

TECHNOLOGY PARTNER

CERTIFIED TECHNOLOGY

Overview

Structured data from any log message, readily available with no effort.

Executive Summary

Log management is a critical component of your IT environment, whether you need to respond to security incidents, troubleshoot infrastructure issues, debug applications or drill down in millions of logs for forensics or compliance audits. By partnering with Red Hat®, we can provide a certified solution on one of the most important platform for enterprises to their log collection and management needs.

Statement from Partner

Without centralized log management, dealing with log related issues can quickly become an impossible task. Many of our customers are using syslog-ng in a Red Hat environment, and as containerized operation becomes more and more popular, this partnership will enable us to deliver more flexibility to existing and future syslog-ng users.

Statement from Red Hat Connect

"Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model," said Mike Werner, senior director, Global Technology Partners, Red Hat. "Red Hat container certification assures a supportable and performant platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Balabit, resulting in the world's largest commercial ecosystem for containers."

Product Benefits

Centralize your log management with syslog-ng to:

- Have confidence in the data underlying your analytics, forensics and compliance efforts
- Scale up your log management and optimize your SIEM
- Flexibly route logs and store them securely
- Reduce maintenance and deployment costs with universal log collection

Use Cases

Discover proven use cases and business drivers of our solution for enterprises.

• Optimizing SIEM

Improve the performance of your SIEM by reducing the amount and improving the quality of data feeding your it.

• Universal log collection and routing

Organizations using multiple analytic tools and storage solutions often use multiple log management tools. syslog-ng flexibly routes log data from X sources to Y destinations. Instead of deploying multiple agents on hosts, organizations can unify their log data collection and management.

• Meeting compliance requirements

IT departments increasingly find themselves spending ever more resources on compliance as laws, regulations and industry standards mandate increasing security awareness and the protection of sensitive data. A secure log management solution can help meet compliance requirements.
