## Company Description

Communicate anywhere with our web, embeddable, desktop and mobile clients. Rocket.Chat is the leading open source team communication platform. A free Slack alternative to take back control of your data, save time and increase productivity. Message, screenshare and conduct audio and video conferences in private, public and guest channels. Secure user roles with our advanced access control tools. Embed chat in your web and mobile applications with LiveChat and transform your team chat into a single communication platform for messaging, customer support and lead generation. Make Rocket.Chat your own with our open source community, partnership integrations, plugins and powerful APIs.

## Product Profile

The easiest and quickest way to setup, run and scale a Rocket.Chat cloud solution, fully taking advantage of Red Hat OpenShift to run either as a single instance or over a robust, scalable multi-instance cluster.

**TECHNOLOGY PARTNER****CERTIFIED TECHNOLOGY**

## Overview

The leading open source team messaging alternative to Slack, on the Red Hat® OpenShift cloud.

## Executive Summary

Efficient real-time communication is critical to successfully and consistently deliver value to customers. Rocket.Chat has partnered with RedHat® to deliver a containerized cloud solution that ensures your team chat scales with your success and meets the increasing demands that follow. The solution takes advantage of Red Hat OpenShift features in the most optimal way to ensure you have a cost effective and scalable communication platform no matter the size of your organization.

## Statement from Partner

*“As real-time team communication matures, enterprises are looking for a single platform to unify communication across functional groups. We built Rocket.Chat and our innovative LiveChat feature to master all team and customer communication from a single solution, without the burden of multi-system context switching. With LiveChat, teams can manage their customer support and sales leads directly alongside their team chat, saving time and money on subscriptions, training and support. We are extremely excited to partner with Red Hat to bring Rocket.Chat to OpenShift making it easier than ever for enterprises to setup, run and scale the only team communication platform they will ever need.”* Gabriel Engel - Rocket.Chat CEO and Founder

## Statement from Red Hat Connect

*“Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model,”* said Mike Werner, senior director, Global Technology Partners, Red Hat. *“Red Hat container certification assures a supportable and performant platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Rocket.Chat, resulting in the world’s largest commercial ecosystem for containers.”*

## Product Benefits

Run the leading open source team communication platform on a cost-effective, scalable and secure cloud solution:

- Significantly reduce the time and expertise needed to setup, run, scale and support your own team chat solution.
- Take advantage of Rocket.Chat's containerized architecture running on the OpenShift cloud to provide a cost-effective solution no matter the size of your organization.
- Run the official supported Rocket.Chat containers on the secure OpenShift cloud.

## Use Cases

Startups, universities, banks, governments, NGOs and global enterprises trust Rocket.Chat for:

### • Team Messaging

The ultimate team chat platform. Message, screenshare and conduct audio and video conferences in private, public and guest channels. No user restrictions, so Rocket.Chat can grow with you no matter the size.

### • Compliance and Security:

Rocket.Chat is trusted by governments and banks who need to control all aspects of their data access and management.

### • Customer Support and Lead Generation:

LiveChat enables you to embed your team chat in your website or mobile app to unify customer communication and team chat into a single communication platform.
