

# Break-through Application Development & Deployment Productivity

## Red Hat Software Partner

Build applications quickly that are targeted to specific operational business problems that incorporate existing information from other apps and databases. Choose your database, web server, cloud or on premise, and even the Operating system. Everything needed in one package.

- Significantly Improved Time to Benefit.
- Maximum Flexibility means investment protection.
- No additional tools needed.
- Significant cost reductions

**Simplify access the cloud whether developing or using application with standard browsers. Consolidate data and applications creating new applications – fast.**

*“Developers and architects looking to build new applications in, and for the cloud, or migrate existing applications to a cloud-based infrastructure, partner with Red Hat to develop and deliver more supportable solutions sooner. Red Hat certification assures a supportable platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Vacava resulting in the world’s largest open, and commercially supportable application ecosystem.”*

Mike Werner, Sr. Director, Global Technology Partners, Red Hat.

## Executive Summary

Businesses worldwide are understanding the advantages of moving application workload to the cloud – whether public or on premise – to gain flexibility in deployment and scalability options, and in many cases reduce costs. The challenge is how your current business applications evolve or change to take advantage of the cloud. RapidBIZ is designed from the bottom up to both develop and deliver line of business applications in the cloud without needing to learn a new language. RapidBIZ combined with Red Hat and OpenShift allows you to maximize the advantages the cloud promises by providing a robust, yet easy to use certified development and deployment environment.

## Product Profile

RapidBIZ™ is a simple to use, integrated cloud development, and delivery hosting environment that enables significant productivity and cost advantages. It enables IT organizations to increase development productivity, speed of delivery, and application quality with time to benefit improvements as high as 80% over traditional development methods. It is a complete cloud development, delivery and hosting environment leveraging Docker containers, Kubernetes and OpenShift to maximize ease of deployment, and enterprise scalability and management of applications.

## Product Benefits

### Time to Benefit

Build applications quickly targeted to specific operational business problems that incorporate existing information from other sources.

### Flexibility in Deployment

Choose your database, web server, cloud or on premise, and even the Operating system.

### No Additional Tools or Software Needed

RapidBIZ has all the development tools needed to develop, deliver and manage applications.

### Reduce the Cost of Applications

Significantly less to develop applications mean significantly lower cost.

*"I don't really know much about RapidBIZ except to say I know it's the development environment that delivers an important part of the solutions we use to ensure we respond to the academic needs of our students quickly. Request for enhancements to our applications are normally addressed and deployed for our use within a day – sometimes within hours of the request. So, we can confidently recommend RapidBIZ to any organization that delivers application solutions to their customers – you'll make them extremely happy."*

*Jeffrey Erickson, Principal,  
Minnetonka High School*

**About Red Hat**

Red Hat is the world's leading provider of enterprise open source software solutions, using a community-powered approach to deliver reliable and high-performing Linux, hybrid cloud, container, and Kubernetes technologies.

Red Hat helps customers integrate new and existing IT applications, develop cloud-native applications, standardize on our industry-leading operating system, and automate, secure, and manage complex environments. Award-winning support, training, and consulting services make Red Hat a trusted adviser to the Fortune 500. As a strategic partner to cloud providers, system integrators, application vendors, customers, and open source communities, Red Hat can help organizations prepare for the digital future.

**Use Cases**

- Modernize Old Processes and Applications while leveraging existing application code and data.
- Build New Micro Server Apps quickly – targeted to specific processes taking advantage of existing information.
- Build new or extend enterprise applications protecting the investment through the flexibility RapidBIZ provides.

*"Based on our experience with RapidBIZ, the prebuilt components & features, along with legacy code integration is minimizing the need to write new code and accelerating our development efforts. We are looking forward to expanding our use of RapidBIZ to additional new projects."*

*Jonathan Craig Parkes, Senior EVP, Silverlake Symmetri*

**About VACAVA**

VACAVA has been developing and delivering custom applications to customers large and small with RapidBIZ for over ten years. RapidBIZ was developed by business application developers focused on making their job faster and more efficient by reducing the amount of code they had to write and test. Having partnered with Red Hat and IBM, VACAVA is now making RapidBIZ available so all businesses can benefit from its break through capabilities. Developers who use RapidBIZ, will have excited and happy customers.
