## Company Description

nearForm is one of the most globally active contributors to the Node.js project and sponsors many Open Source projects in the Node ecosystem.

Our Architects, Developers, Designers and DevOps experts have been developing complex solutions for global organizations since 2011.

The deep domain knowledge of our team of Node experts enables them to assist a broad range of clients with their full stack JavaScript architectures.

Our reputation in this area has led many of our customers to request that we provide them with a commercially-supported Node.js distribution. This has resulted in the creation of the nearForm Node.js containers.

## Product Profile

nearForm provides a commercially supported Node.js 8.x LTS image. It is 100% OSS, generated directly from the latest Node.js Foundation sources with no closed source components. This ensures you can confidently rely on nearForm whilst avoiding vendor lock-in.

**TECHNOLOGY PARTNER** **CERTIFIED TECHNOLOGY**

## Overview

Our OpenShift distribution of Node.js gives you access to a team of world-class Node.js experts, including top contributors to the Node.js project.

## Executive Summary

As the use of Node.js continues to accelerate in the Enterprise, many organizations, including Government agencies, require commercial-grade open source support.

By using the nearForm Node.js images, you know that they are reliable, secure and fully up-to-date with the latest code from the Node Foundation and OS updates from Red Hat.

If you encounter a support issue, the most experienced Node.js people in the industry are available to you to help solve it.

## Statement from Partner

*“As the number of nearForm customers who are moving to OpenShift continues to grow, so too does their need for the latest LTS releases of Node.js with our support,”* said Cian O’Maidin, nearForm CEO. *“Red Hat’s Certified Container Program is the ideal distribution mechanism for such images and we’re excited to work with them on this initiative.”*

## Statement from Red Hat Connect

*“Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model,”* said Mike Werner, senior director, Global Technology Partners, Red Hat. *“Red Hat container certification assures a supportable and performant platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like nearForm, resulting in the world’s largest commercial ecosystem for containers.”*

## Product Benefits

- The latest secure, stable versions of Node.js
- World-class support
- Access to renowned experts in Node.js

## Use Cases

nearForm's Node.js containers can be used for:

- Existing Node.js users migrating to OpenShift
- Organisations migrating to Node.js
- Organisations requiring the latest versions of Node
- Organisations requiring support contracts with industry experts

**The nearForm Node.js images are free to use.  
Try them now using your Red Hat entitlements.**
