Company Description

Bleemeo builds a cloud based monitoring solution for scalable IT infrastructures.

Product Profile:

Based on an open source agent available as a Red Hat® container, Bleemeo provides an easy to deploy solution that allows you to concentrate on your business and get an efficient monitoring solution.

Overview

Install Bleemeo agent and get dashboards, metrics and alarms in less than 60s without configuration.

Executive Summary

In less than 60s get a real-time web dashboard to measure infrastructure availability and performance, System metrics (for physical and cloud servers), services (database, web server, etc.), containers are detected and monitored without any manual configuration. Business metrics can be integrated using Graphite, StatsD or Prometheus protocols.

Statement from Partner

“For our customers, being a Red Hat certified technology partner demonstrates we fulfill to industry best practices and that we are committed to support the solution. For a startup, this compliance and joining the Red Hat ecosystem make our customers more confident in our solution.” said Lionel Porcheron, CEO and co-founder of Bleemeo.

Statement from Red Hat Connect

“Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model,” said Mike Werner, senior director, Global Technology Partners, Red Hat. *“Red Hat container certification assures a supportable and performant platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Bleemeo resulting in the world’s largest commercial ecosystem for containers.”*

Product Benefits

Build a monitoring solution with Bleemeo and Red Hat to:

- Ensure your service is always up and running and that your teams know when something goes wrong.
- Track your service performance to offer your customers the best user experience.
- Deploy infrastructure needed and no more!

Use Cases

Discover how easy it is to monitor with Bleemeo:

- **Monitor Cloud infrastructure.** Bleemeo agent integrates with cloud servers, and connect metrics from infrastructure as a service providers.
- **Monitor applications.** Push business metrics from applications using StatsD, Graphite and Prometheus to concentrate data on a single dashboard and improve analysis.
